

INTRODUCING HILO MOBILE

Your Cloud and Browser-Based Mobile Pharmacy Solution

Easily conduct pharmacy transactions with your patients using Emporos's **Hilo Mobile** solution. This revolutionary platform enables outpatient pharmacies to deliver patient medications at bedside for increased efficiency, safety, and profitability. How? Pharmacy staff simply sign into Hilo Mobile using their Windows tablet, iPad, or laptop and they're ready to get their patients the right medication and over the counter (OTC) items effortlessly.

Hilo Mobile was built with pharmacies in mind. Start your shift by staging the patients and room numbers that you need to visit in Hilo Mobile. Then, check each patient off the list as you efficiently collect payment, deliver the items, and capture signature (and identification if needed). Now you're ready for the next patient. Discharge patients faster with what they need to maintain their health for reduced readmissions.

Bedside delivery just became a whole lot easier.

Benefits

- Easily check-out and collect payment from patients right at bedside
- Never worry about the reliability of your servers again - the cloud has you covered
- Edit transactions at bedside: if the patient decides they do not want a certain prescription or OTC item, simply remove that item in Hilo Bedside
- Reduce readmission rates by improving first-fill rates and ensuring patients don't leave the hospital without their medications
- Simple navigation enables a user-friendly experience for pharmacy staff with little to no training required
- Reporting is available via site, station, till, and drawer
- Easily view active transactions and completed purchases
- Access customer and transaction notes and the patient's room number with a few clicks
- Compatible on most commonly used bedside delivery devices: a Windows tablet, iPad, or laptop

Features

- Integrated with your desktop Emporos Point of Sale (POS) solution and backend MerchantSoft Enterprise platform
- Cash, check, credit card, payroll deduction, accounts receivable, and custom payment methods all accepted
- Easily search your over the counter (OTC) inventory, scan barcodes, and change quantity
- Optional Payroll Deduction module allows employees to purchase prescriptions or over the counter (OTC) items by deducting the cost directly from their paycheck for increased pharmacy utilization rates - no credit card or other tender necessary
- Optional Accounts Receivable module allows you to pull up a patient's account for simplified check out
- Single Sign On access makes it easy access and safer from security risks
- Will call allows you to see which prescriptions are ready for dispense to ensure patients have access to the medications in a timely manner
- Adheres to required regulatory compliance policies and safety guidelines such as patient counseling, signature capture, and HIPAA guidelines
- Securely send receipts directly to the patient's email immediately following the transaction
- Web-based functionality allows Emporos to roll out updates seamlessly, causing little to no downtime for your pharmacy
- Offline mode activated in the event that you lose connectivity
